Abstract (en)

Clamp for securing snow-stop means to metal plates of roofing, comprising a first clamping jaw (10) with a larger base (10a) and a smaller base (10b) and a second clamping jaw (20) with a base (20a), said bases extending in a longitudinal direction (X-X), said first clamping jaw (10) having recesses (11) extending towards the inside of said first clamping jaw and aligned with each other and situated opposite each other in a vertical direction (Z-Z) perpendicular to the direction of said bases (10a,10b); said recesses (11) have a respective side (11a, 11b) corresponding to the associated base (10a,10b), which is open outwards, and inner side (11c) with a semicircular shape, and the first clamping jaw (10) and the second clamping jaw (20) have at least two respective openings (13,23) in symmetrically opposite positions relative to the respective seat (11,21) of the larger base (10a,20a) and suitable for receiving a bolt (24a) which can be joined to a nut (24b) for clamping together the two clamping jaws (10,20).
