Abstract (en)

[origin: DE102011114225B3] The training unit has a training flight body (1) forming an unmanned missile, and a configuration unit (2) connected to the missile of the flight body that includes an error storage unit (13). The configuration unit is formed in such a manner that simulated error data and/or error image are provided in the storage unit. A flight body-hardware remains unchanged, and the missile is presented as simulated error that is stored in the storage unit. The flight body includes data storage, and training mission software is provided in a data storage unit.
