Abstract (en)  
A cash management system has a cash unit (2) for depositing cash, a cash register unit (3) which is configured to enter the price of at least one item and which is connected to the cash unit (2), and a receipt printer (4) for dispensing receipts, which is connected to the cash register unit (3) and/or the cash unit (2). The cash unit (2) is configured to retrieve or receive information regarding the quantity of items, the price per item and/or the total number of items from the cash register unit (3) and/or the receipt printer (4).
