Abstract (en)

[origin: EP2573786A1] The power switch has a switching device region equipped with a quenching chamber device and a contact slide device provided with the movable contact portions. The movable contact portions are positioned opposite to fixed contact portion. Another switching device region has a trigger assembly comprising a short-circuit release portion and an overload release portion. The fixed contact portions are plugged at the housing and stabilized by a tripping case stabilizing element (1) made of plastic such as polyamide 66 (PA66).
