Abstract (en)
A ski boot construction comprises a boot shell to which a front bootleg and a rear bootleg are pivoted, the front bootleg being pivoted to the shell at a front pivot pin, and the rear bootleg being pivoted to the boot shell at a rear pivot pin, said rear pivot pin being arranged at a withdrawn and lower position with respect to said front pivot pin, the position of said front bootleg being adapted to be locked, with respect to said boot shell, through a locking hook element which can be automatically actuated by inclining frontward the front bootleg.
