Abstract (en)

[origin: EP2574582A2] The hose reel cart comprises a hose-winding drum (11) having a horizontal axis rotationally supported by a pair of lateral sides (1) which act as connecting elements for a support shaft (2) of a pair of wheels (4) and for two U-shaped tubular elements (5, 7), with the top tubular element (7) acting as a maneuvering handle and the bottom tubular element (5) acting as a support base on the ground. Each side (1) is shaped as a box-like plate (15) made of plastic material having an outer side (16) with a smooth surface and an inner side (17) with a recessed surface defined by a plurality of inner ribs (18) of said box-like plate (15). (Fig. 3).
