Abstract (en)

[origin: EP2574849A2] The control device (8) comprises a touch-sensitive control element (10) with an effect-sensitive control region for adjusting the two operation conditions of the household appliance (1). The two operation conditions of household appliance are adjusted according to the contact of areas comprised within the control region. A light emission region is provided in control element for optically displaying the respective operation condition setting. Alteration of operation condition setting is displayed by color change of light emitted from light emission region. Independent claims are included for the following: (1) a household appliance; and (2) a method for operating control device for household appliance.
