Abstract (en)

[origin: WO2011151054A1] The invention relates to a drawer wall element consisting of a profiled section (2) with a receiving portion for receiving a floor element (1) of a drawer. According to the invention, the receiving portion is designed as a protrusion (3) that forms a lateral stop (7) and an upward stop (4), when a drawer is viewed in the use position, for a floor element (1). The protrusion (3) is open at the bottom, and prepared recesses (5, 6) for anchoring floor retaining elements (12) are provided in the profiled section in order to push a floor element (1) towards the protrusion (3).
