Abstract (en)

[origin: WO2011150435A1] The invention relates to an arrangement for a drawer pull-out guide (1) that has at least two rails (5, 6, 7) that are guided on one another in a telescopic manner. The arrangement has at least one roller (2) and at least one roller axis (3) on which the roller (2) is rotatably mounted. The arrangement has a stop damping body (13) that lies preferably directly in front of and/or behind the roller (2) at least in some areas when seen in a direction (14) normal to the roller axis (3), said roller being rotatably mounted on the roller axis (3). The stop damping body has a softer material than the roller (2) that is rotatably mounted on the roller axis (3).
