Abstract (en)

[origin: WO2011151401A1] The invention relates to a transporting and molding belt (6) comprising a supporting surface for transporting products and at least one structured region within the supporting surface. The at least one structured region has recesses, said recesses forming a network. At least 60% of each structured region is free of recesses, and the volume of the recesses ranges from 10 to 80 mm³ with respect to a base of 1 cm.
