Abstract (en)

[origin: WO2011151440A1] The invention relates to a method and to a mobile mounting device (11) for the automated mounting of modules (16) on receiving devices (17), in particular of solar modules on stands, in which method a module (16) is gripped by a mounting tool (24), wherein, before transferring the module (16) to the mounting position (36), the handling device (21) is transferred to a measuring position (35) above the mounting position (36), the location of mounting points (37) in the mounting position (36) is determined, the module (16) is transferred to the mounting position (36) starting from the measuring position (35), and the assembly movement is carried out automatically.
