Abstract (en)
[origin: WO2011147384A2] The present invention relates to a device for maintaining a stable position of a container (4), containing a casing having an outer cubic surface (1) and an inner spherical surface (2) and a carrier (3) of the container (4) equipped with steering devices (6), wherein the container (4) carrier (3) is in the form of a spherical cap and is equipped with six steering devices (6), which are sliding elements; and the bottom of the spherical cap of the container (4) carrier (3) is provided with a stabilizing weight (5).
