Abstract (en)

[origin: WO2011154866A1] The present invention relates to a capsule (1) comprising a body (2) that has a space in which the powder will be put, becomes smaller downwards, the upper part of which is open and is in the form of a pot; at least one foil (3) which is used to cover the lower part of the body (2) and enables the powder (T) to remain in the chamber; and enabling the powders present therein to remain without deterioration for a long time.
