Abstract (en)

[origin: WO2011151605A2] The invention relates to a construction element made up, through the body thereof, of an alternation of one or more sheets of flat cardboard pasted together with one or more sheets of corrugated cardboard. Said construction element also comprises, in the body thereof and extending across the height and/or width thereof, at least one structuring stiffener (8). The invention also relates to a construction method using such construction elements.
