Abstract (en)

[origin: WO2011147510A2] The invention relates to a turbine for an exhaust gas turbocharger (22) of an internal combustion engine (10), comprising at least one housing part (56), which has at least two spiral channels (58), through which exhaust gas of the internal combustion engine (10) can flow and which have respective spiral inlet cross-sections (As), wherein the housing part (56) is accommodated in an accommodating chamber (74) that is common to the spiral channels (58) and that is formed by at least one further housing part (72) of the turbine (54), from which accommodating chamber exhaust gas of the internal combustion engine (10) can flow through the spiral inlet cross-sections (As) into the spiral channels (58).
