Abstract (en)  
[origin: WO2011151560A1] Internal combustion engine supplied with fuel and equipped with a low-pressure exhaust gas recirculation circuit and with an additional system for producing hydrogen. Internal combustion engine (1) supplied with fuel and equipped with a turbocharger (2), with a low-pressure circuit for the partial recirculation of the exhaust gases (5) and with an additional hydrogen production system (11) comprising a fuel reformer (17). The reformer (17) is supplied by an inlet pipe (13) tapped off an air intake pipe (6) of the internal combustion engine (1) downstream of the compressor (2b) of the turbocharger (2), the reformer comprising an outlet pipe (18) tapped into the air intake pipe (6) of the internal combustion engine (1).
