Abstract (en)
[origin: WO2011148170A2] A heat storage cooker comprising a least one oven cavity formed by walls of cast iron, and at least one electric radiant heating element which is in thermal contact with at least one wall such that in use the electric radiant heating element transfers heat energy to the wall which subsequently radiates at least part of that heat energy in to the oven cavity. Two or more ovens may be provided, each one with its own radiant heating element.
