Abstract (en)

[origin: CA2800921A1] The invention relates to a water distribution system comprising a water distribution pipe. According to the invention, such a system comprises a device (62) for measuring the value of at least one parameter representative of the quality of the water flowing in said distribution pipe (12, 14), said device (62) comprising at least one means for measuring said parameter and means for directing, with regard to said measurement means, all of said water flowing in said distribution pipe.
