Abstract (en)
[origin: EP2578136A1] A dishwashing machine of the present invention includes an operation unit for receiving an input of instructions to the dishwashing machine; a control unit for controlling operation of the dishwashing machine according to control information having been input to the operation unit, covered with a cover; and a display unit for displaying operation conditions of the dishwashing machine. The control unit includes a memory from which the information about an operation process state can be read and to which the information can be written; and a memory control unit for making the display unit display the information written in the memory, operated with the cover detached.
