Abstract (en)
[origin: EP2578371A1] Plant for the manufacture of concrete comprising multiple silos (B) for the loading of cement and of inert materials, scales (3) for the dosing of cement and of inert materials supplied by said silos (B) through belt- and screw- conveyors (5, 6), a mixer (4) supplied by said dosing scales (3) and apt to manufacture the concrete, a water tank and any additive tanks. The silos (B g , B s) of the inert materials consist at least in part of a plurality of containers (1), stacked with no permanent, mutual-fastening means, each one of such a size as to be able to be road-transported, full of inert materials, through an ordinary means of transport. A crane (C) - permanently present in the plant and also used for the assembling/disassembling of the same - provides to the handling of said loaded containers (1) from said means of transport to said silos (B g , B s) and vice versa when said containers are empty.
