Abstract (en)

[origin: EP2578416A1] The process for decorating the surface of a film of fluorinated polymer comprises the steps of: printing, with resins, a three-dimensional decorative pattern on one face of a second polymer film; bringing in contact the decorated face of the second film and at least one surface of the film of fluorinated polymer and supplying thermal energy to them; and detaching the second film from the film of fluorinated polymer, onto whose surface the decorative pattern has been transferred.
