Abstract (en)

[origin: EP2578741A1] There is disclosed a dishwasher (1) comprising a rinsing chamber (4) for cleaning dishes. For drying rinsed dishes by process air (48) the latter can be discharged from the rinsing chamber and can be dried and heated via a heat exchanger (16). Downstream of the heat exchanger the process air is supplied to the rinsing chamber. The heat exchanger (16) includes a thermoelectric heat pump (62,64) for cooling and drying the process air, wherein waste heat of the heat pump is discharged through a heat pipe (66,68).
