Abstract (en)

[origin: EP2578786A2] The holding device comprises a horizontal guide element (150) with a guide roller (151), which is secured with the locking counter-portion (120) in a releasable locked state. A mounted or fastened arm (110) is provided with a locking element (111). The locking counter-unit is covered laterally, and is arranged in a guide region of three sides. The locking counter-portion is axially secured or attached on the horizontal guide element at a journal (152) of the guide element. An independent claim is included for group of sliding or folding wing elements.
