Abstract (en)

The invention relates to a device (1) for fastening at least one cord, in particular at least one cord (103) of a screen such as a window covering, to a surface (202). The device comprises a base (10) which is adapted for fixing to the surface and a cover (20) which is adapted for fastening of the cord. The cover and the base are adapted for releasable attachment to each other. According to the invention the device comprises a bayonet closure (11, 21) for releasable attachment of the cover to the base.
