Abstract (en)
[origin: WO2011154145A1] The sales table comprises a product receiving area (4) for receiving products as well as four legs (1) and a base (7) for supporting the products in the product receiving area. Four side walls (5) for laterally delimiting the product receiving area are fastened to the legs. At least one of the side walls (5) has a bent area (19) directed downward like a hook which can be hooked from above in a recess (17) at the upper end of at least one of the legs (1). The side wall (5) or a part (13) thereof can be unhooked from the recess (17) and folded away by means of a simple hand movement, and the sales table can be completely disassembled or reassembled by means of only a few more hand movements. Thus the recess (17) and the bent area (19) are robust components of the table which are simple to produce, provide a stable and rigid connection between the side walls and the legs (1), and enable easy handling of the table.
