Abstract (en)
[origin: WO2011154307A1] A printer assembly (1) including a medium delivery station (14), a medium input station (13), and a printing station (12) comprising a moveably arranged element. The printer assembly extends substantially vertically between a first end and a second end and the medium delivery station, the medium input station and the printing station are arranged along a line between the first end and the second end. The first end is configured to be supported on the support surface, while the printing station is arranged closer to the first end than the medium delivery station and closer to the first end than the medium input station. A direction of movement of the moveably arranged element has at least a substantial horizontal component.
