Abstract (en)
[origin: WO2011154548A1] The invention relates to a waste container comprising a bin that is open at its upper end and a lid (30) that can move about a horizontal axis relative to the bin between a closed configuration in which it closes the upper end of the bin and an open configuration. The container also comprises, on one of its walls that are visible from the outside when the lid is closed, a display device (38) comprising at least one element (42) that can be moved between two indication positions.
