Abstract (en)

[origin: WO2011154381A1] The present invention relates to a household appliance (1) comprising a panel (4) whereon at least one button is disposed allowing the selection of the programs, a memory (2) wherein the program steps and program duration (tp) are recorded by the producer and a control unit (3) that measures the mains voltage (Vcc), allowing the program to be actuated if the mains voltage (Vcc) is between the limit voltages (Vlow-Vup) recorded in the memory (2) thereof and stops the program if the mains voltage (Vcc) is outside of the limit voltages (Vlow-Vup) recorded in the memory (2) thereof.
