Abstract (en)
[origin: TW201144552A] The present invention relates to a mounting arrangement for a door operator for actuating a door, including a mounting plate, which is configured to be mounted to a reception such as a door leaf, a door transom, a wall, a ceiling or the like, wherein the door operator is attached to the mounting plate. According to the invention, it is provided that the mounting plate has at least one latching means and the door operator has at least one counter-latching means, wherein, for arranging the door operator at the mounting plate in a retained manner, the latching means can latch in the counter-latching means. (Refer to Figures 1 and 2)
