Abstract (en)

[origin: WO2011154343A2] The invention relates to a method for detecting an incorrect representation of image data (B) on a display unit (10). In order to enable prompt and particularly reliable detection of an incorrect representation of image data (B) on the display unit (10), the method according to the invention occurs in such a way that the image data (B) to be displayed are transmitted to the display unit (10), test data (P) are detected by electronically detecting at least part of the image represented on the display unit (10), and an incorrect representation of the image data (B) on the display unit (10) is detected by electronically evaluating at least part of the detected test data (P). The invention further relates to a device for detecting an incorrect representation of image data (B) on a display unit (10).
