Abstract (en)

[origin: WO2011154099A1] In order to form a corresponding cloud with active decoys (1), an antenna (7) and a system-on-chip (SoC) etc. with an integrated sending/receiving unit (2, 3) are preferably imprinted on each said decoy. The design is comparable to an RFID (radio-frequency identification) with the dimensions of approximately one chip card. The antenna (7) is preferably an ultra-broadband antenna.
