Abstract (en)
[origin: EP2580980A1] The boot i.e. cross country ski boot (1), has an outer sole assembly (2) and an upper (3), where the boot extends from a heel (4) until front end/tip (5) in length and between a lateral portion (6) and a medial portion (7) in width. The upper has a lateral quarter (15) and a medial quarter (16). A tightening device comprises linkage strands (31, 32) and a quick-locking mechanism (34). A cover flap (35) demarcates a storage space (40) to receive the mechanism. The flap has an opening, and the mechanism is positioned in the opening when the tightening device tightens the linkage strands.
