Abstract (en)
[origin: EP2581476A2] The pressure finger (8) has a press-finger platform (7) which is provided with openings for roving element (2). The slots are opened so as to introduce the roving elements in the opening. The slots are inclined at an angle less than 45 degree with respect to running direction of the roving elements. The longitudinal dimension of opening is greater than the transverse extensions. The distance of mouth region of slot from the end of the longitudinal extension in running direction of roving element is greater than half of the transverse dimension.
