Abstract (en)

[origin: EP2581492A1] The invention relates to a method in a fiber web machine. In the method, the position of the splice (14) in a fabric (12) is changed in order to minimize the vibration level of the fiber web machine. The position of the splice (14) is determined on the basis of the width of the fabric (12). The invention also relates to an arrangement in a fiber web machine, and to a software product.
