Abstract (en)

[origin: EP2581518A2] The connection apparatus (1) has a base (4) that is installed beneath the profile elements (2,3). The platform-side sealing devices (5,6) are provided for sealing the base to the profile elements. The sealing devices are directly arranged on cured surface (7) of the base, and are provided with sealing lip elements which are spaced apart from each other. Independent claims are included for the following: (1) covering arrangement for building; and (2) method for manufacturing universal shock connector of profile elements.
