Abstract (en)  
[origin: EP2581524A2] The container (1) has container modules (21-24) comprising a front wall element (2) that is provided with disks. Rear side of the container modules are closed with rear wall modules (41-44) that are designed as closed walls. One of the rear wall modules has a window, and another rear wall module has a door. One of the container modules has supporting frames that are connected with one another by rods, where the rods are arranged in a base area. An intermediate base carrier forming an intermediate base structure is arranged in the base area adjacent to the rods.
