Abstract (en)

[origin: EP2581667A2] The present invention relates to a cooking appliance (10) including a plinth (14) and a drawer (16). The cooking appliance (10) includes a corpus (12) arranged or arrangeable above the plinth (14). The drawer (16) is arranged or arrangeable in a lower portion of the corpus (12) and above the plinth (14). The plinth (14) is connected or connectable to the corpus (12) by a set of screws (26) and a corresponding set of screw holes (38, 40). The cooking appliance (10) includes a pair of elongated drawer rails (20) for moving the drawer (16) into and out of the corpus (12). The plinth (14) is selectively connected or connectable to the corpus (12) either at a predetermined front position or at a predetermined back position. Each of the drawer rails (20) is symmetric in respect of an axis and/or plane perpendicular to the longitudinal axis of said drawer rail (20). Further, the present invention relates to a corresponding drawer rail (20).
