Abstract (en)  
[origin: EP2581697A2] The ammunition container (1) has a plate-shaped guide element (6) pivotally mounted on a side wall (4,5) for rollover stabilization of ammunitions (3). The guide element is inserted between two layers (7 to 15) of an ammunition belt (2), particularly between every latter and fourth position. The guide element is mounted on a front side (16) of the ammunition container. The guide element is mounted on the side wall opposite to an extension direction (AR) of the ammunitions.
