Abstract (en)
Gaming machines and gaming systems having video depictions of one or more mechanical reels projected onto a curved display are disclosed herein. In one embodiment, the gaming machine includes a curved transparent material having an outer surface, an inner surface, and a radius of curvature similar to a mechanical reel. The gaming machine also includes a light emitting diode projector for projecting video images of one or more reels onto the inner surface of the curved transparent material. The gaming machine also has a liquid crystal display having an opening in which the curved transparent material extends through the opening of the opening of the liquid crystal display. In another embodiment, the gaming device includes a touch screen system positioned in front of the curved material. The touch screen system has a touch sensor assembly having a substantially transparent touch panel that produces touch data when activated, a touch panel controller for controlling and interpreting the touch data, and touch panel software for controlling and interpreting touch data.
