Abstract (en)

The frame (1) has two frame halves (2, 3) latched with each other by linear shifting of one frame half relative to the other frame half into a sliding direction. A projection, recesses and latch parts e.g. detent devices, are provided at the frame halves corresponding to each other. The two frame halves are locked with each other in different detent positions during linear shifting. The frame halves are spaced at different spacing (92) to each other. A guide part and a guide counter part are arranged at one of the frame halves. The recesses are retainers, holes or blind holes. An independent claim is also included for a plug connector module.

Abstract (de)

Halterahmen (1) für Steckverbindermodule (15a, b, ...), der zwei Rahmenhälften (2, 3) aufweist, die durch Linearverschieben der einen Rahmenhälfte (2) relativ zur anderen Rahmenhälfte (3) in eine Schieberrichtung (X) miteinander verrastbar sind, wobei an den Rahmenhälften (2, 3) jeweils zueinander korrespondierende Rastmittel (13, 14a, 14b; 130, 140) vorgesehen sind, die beim Linearverschieben ein Verrasten der beiden Rahmenhälften (2, 3) miteinander in zwei verschiedene Raststellungen bewirken, in denen die Rahmenhälften (2, 3) in verschiedenem Abstand (91, 92) zueinander beabstandet sind.
