Abstract (en)
[origin: WO2011157353A1] The invention relates to a disposable glove (1) made of two layers (2, 4) of thin planar water-tight plastic material, which are connected to each other by a sealing seam (5) along a hand contour so as to leave open a slip-on opening (3), wherein said glove is produced in a form that is favorable, comfortable to handle, and small to pack and that can be contoured correctly to one's hand and that can be produced simply, even in large scale production, in such a way that at least one of the layers (2, 4) is made of a fine-pore, non-woven polyethylene fiber material that is pressed on both sides with heat and pressure to form fiber laminate surfaces and that has a weight per unit area of less than 100 g/m².
