Abstract (en)  
[origin: DE102010030222B3] The vacuum cleaner has an auxiliary air valve (30), a moving locking element (50), an elastic element (37) and a separator (33) with an air opening (60). The locking element is brought in a closed position by the elastic element. The characteristics of the air valve run in digressive sections in force-displacement curve.
