Abstract (en)
[origin: WO2011157837A1] The invention relates to an arrangement having a strip (1), comprising a plurality of, in particular six, little bags (3) for receiving cigarette or cigarillo butts, and optionally cigarette or cigarillo ash, consisting of a tape (11) that is folded multiple times, wherein one of the longitudinal edges (25) of the little bag (3) is formed by simple folding and the other longitudinal edge (27) of the little bag (3) is formed by a narrow, folded-over edge strip (17), which is glued to the remaining part (21) of the strip. The little bags (3) can be separated from the arrangement by tearing, wherein the tearing can be prepared by perforations (5, 7). Due to the design of the longitudinal edges (25, 27), the little bag (3) is opened reliably and securely at the end thereof that is located opposite of the end that is closed by a glued joint (9) when the little bag (3) is pressed together such that the longitudinal edges approach one another.
