Abstract (en)  
[origin: WO2011159287A1] Asphalt compositions and products in which the binder comprises tall oil materials possibly previously subjected to distillation, and/or oxidation, and/or combined with a polymer, the tall oil materials having a softening point in the range of 75F to 400F, a Needle Penetration value (0.1mm) at 25C of at least 1, a Rotational Viscosity at 275F in the range of 650cps to 8,000 cps, and a water solubility of less than 10 percent.
