Abstract (en)

[origin: WO2011157623A1] The invention relates to a device (1) for preparing a reducing agent (2) for an exhaust gas system (30), said device being provided with a system heating unit (7) for heating a reducing agent (2). The device (1) has at least one heat conduction element that transmits heat from the system heating unit (7) to at least one of the following components: tank (3), delivery line (6), filter (20), pump (18), valve (19), sensor (21).
