## Abstract (en)

[origin: WO2011162696A1] The invention relates to a method pertaining to an HC dosing system whereby fuel is supplied to a feed device (230) via which fuel is supplied to at least one consumption point (250) from a container (205), comprising the steps of determining presence of air supplied upstream of the feed device (230), and, when such presence is found, of reducing an operating power of said feed device (230) compared with ordinary operation. The invention relates also to a computer programme product containing programme code (P) for a computer (200; 210) for implementing a method according to the invention. The invention relates also to an HC dosing system and a motor vehicle (100) which is equipped with the HC dosing system.
