Abstract (en)
[origin: WO2011157967A1] The present invention relates to a roofing element (1) which includes a roofing section (3), at least one photovoltaic module (2) arranged on a portion of the roofing section (3), and a means (7) for securing the photovoltaic module (2) on the roofing section (3), characterised in that the securing means (7) includes a hinging means (8) enabling the photovoltaic module (2) to be mobile between a first so-called closed position (P1) in which the portion of the roofing section (3) is covered by the photovoltaic module (2) and a second so-called opening position (P2) in which the portion of the roofing section (3) is visible.
