Abstract (en)
[origin: EP2583574A1] The accessory e.g. glove (1) has a textile layer (10) including an external surface and an internal surface, where a coating (20) covers a portion of the external surface of the textile layer. Barbs (30) are distributed on a surface of an area of the coating, where the textile layer includes glass fibers, metal fibers, or aramid fibers. The coating is made of a polymer of the family of nitriles, where the coating covers a palm (2), a lower part (3i), and a distal part (3d) of fingers (3) of the glove. An independent claim is also included for a method for manufacturing a thermal protective glove.
