Abstract (en)
[origin: EP2583581A2] The foil (10) has a surface structure (20) i.e. embossing structure, provided on a surface area (12) in contact with parts of human hair and/or a scalp region to be colored. The structure extends over an entire surface of the foil and is extended along a surface side turned towards the scalp region. The structure includes projections and/or recesses moldable by embossing or punching processes. The projections and/or the recesses exhibit height and/or width ranging from 0.01 to 2 mm. The structure is formed as a coating such as plastic coating with molded structures and grit coating. The projections are formed in pyramidal shaped, cone shaped or triangular shaped.
