Abstract (en)

[origin: EP2583922A2] The tape feeder (1) has a setting unit (4) is provided for setting the distance between separating roller (51) and separating belt (50). A discharge arrangement (7) has an upper outlet extension (70) with upper discharge belt (72) and a lower outlet extension (71) with lower discharge belt (73), which are articulated to each other. A drive is provided to convey the isolated product between the discharge belts. A pivot assembly is provided, by which separating roller is pivotally mounted on the setting unit and is fixable in a predetermined position by the fixing arrangement.
